FULL STACK DEVELOPER

Dedicated Computer Engineering student and aspiring Full Stack Developer. Passionate about creating clean, modern, and aesthetically driven digital experiences. Proven ability to collaborate with design partners to deliver complete website solutions, with a strong interest in applying modern frameworks and AI-driven processing to practical development challenges.

KEY COMPETENCIES

- Full Stack Web Development
 - UI/UX Implementation
 - AI-Driven Image Processing
 - Modern Frameworks (Astro)
 - Client Communication
 - Database Management (MongoDB)
-

PROFESSIONAL EXPERIENCE

Ayrtitech Business Solutions

June - August 2025

Web Development Intern

- Spearheaded the revamp and modernization of a corporate website.
 - Utilized the Astro framework to rebuild the site, ensuring high performance and a clean user interface.
-

KEY PROJECTS

MedX - Final Year Project

- Developed a system utilizing AI-driven visual reasoning to authenticate medicines and identify pharmaceutical information.
 - Integrated Google Cloud Vision AI to analyze 7-second video scans for accurate identification.
 - Implemented MongoDB for robust database persistence and collaborated closely with team members to deliver the final technical solution.
-

EDUCATION & TECHNICAL SKILLS

Education

- Computer Engineering Student
- Vidyalankar Polytechnic

Technical Stack

- Languages: C, C++, Java, Python, HTML, and CSS
- Tools & Technologies: Google Cloud Vision AI, MongoDB, Astro Framework
